

Global Corporate & Commercial

Cyber Insurance

We speak your language

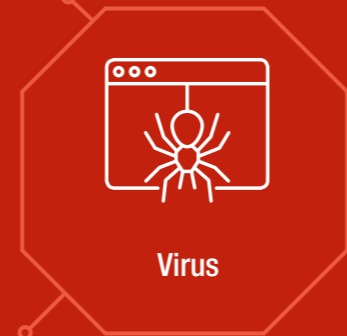

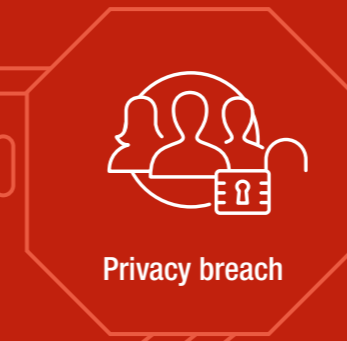

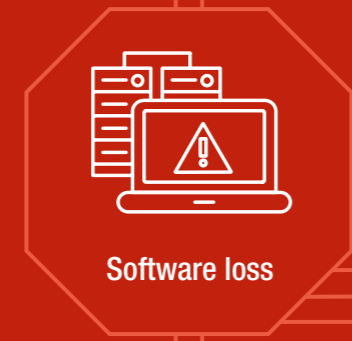

What's keeping you awake at night?

It's a question we ask our clients every day.

The Internet revolution is over.
The Internet won.

Today every business relies on digital technology to operate, develop and grow. Even traditional industries like agriculture and healthcare use databases, email, smart sensors, the Internet and more.

These cyber advantages come at a cost: **increased risk**. Today's businesses are exposed to sophisticated cyber threats including computer viruses, intellectual property theft, cyber attacks and online identity theft. They are also required to comply with stringent privacy regulations.

Enter Generali
Global Corporate
& Commercial Cyber,
your digital armor.

We're here to help.

We take care of the worrying so that you don't have to. While you focus on growing your business, we work hard every day to support and protect every aspect of your company's digital presence.

We strengthen your defenses, mitigate any losses you might experience and restore normal operations as quickly as possible. No matter what your IT landscape looks like – from SMEs to multinational corporations – we have the dedicated services and solutions you're looking for.

At Generali, your challenges are our business

Understanding and mitigating the impact of risk is what we do best.

We work locally with clients all over the world to address a broad range of cyber risks, tailoring our products to suit specific needs and situations. We design solutions that directly address issues like web-sourced business interruption, data theft and systems recovery, to name only a few.

We **SPEAK**
your
language

"We speak your language and partner with your company, using our global experience, local knowledge and cyber expertise to promote your interests. Our specialists work directly with your company, mapping your cyber landscape and tailoring our cyber products and services to your specific needs."

Generali Global Corporate & Commercial

Generali Global Corporate & Commercial

We are proud of our partnership approach.

We'll start by sitting down with you and listening to your **cyber security concerns**. Our first priority is always to walk a mile in the client's shoes, mapping your business landscape so that we can identify the protections best suited to your needs.

In the event your company experiences a cyber attack, we'll be there by your side, working with you to get your business back up and running as quickly as possible, **minimizing any financial impact** and making your company more resilient than ever.

Once we've developed a deep understanding of your needs and expectations, our expert specialists will suggest the **best solutions** for your business. If we don't have an offer providing precisely what you need, we will tailor one specifically for you.

HELPING your
business **succeed**

Even if your company is not in the information technology business, we know your daily operations depend on it. The first thing we do is to sit down with you, listen to your cyber security concerns, and gain a shared understanding of your digital landscape.

Once we have the full picture, we'll take steps to help prevent the worst. In the unfortunate event of a cyber attack, we'll be by your side immediately, focused on getting your daily operations up and running as quickly as possible, minimizing any financial impacts and making your company more cyber-resilient for the future.

ADDING VALUE
beyond **the policy**

We are experts in traditional and emerging risk. The digital world is constantly evolving, so we'll put our cyber security resources at your disposal, giving you the tools you need to prevent and/or mitigate the consequences of cyber threats both old and new. We'll use our advanced risk assessment methodologies to partner with your team, working directly with them to increase your cyber defenses.

AGILE, FLEXIBLE
and **ADAPTABLE**

No matter what your digital landscape looks like, we can and will adapt our solutions to suit your needs. Our experts work with you to find the right combination of services and insurance protection for your company. We spend time getting to know you, understanding the particular challenges and hazards of your business so that we can design the best cyber defense possible.

Insurance tailored to your needs

ONE PRODUCT CYBER INSURANCE

Our Cyber Liability Insurance is tailored to your company's specific size, needs and expectations, starting from these two basic elements:

1. First-Party Loss

This cover protects your company when your business is affected by a cyber attack, causing losses.

2. Third-Party Loss

This cover protects you from damage your clients and/or partners experience as the result of a breach or cyber attack on your company, for example litigation arising from the leak of confidential and/or sensitive data.

Our cyber protection also offers a variety of complementary services, including:

- Loss Prevention
- Loss Mitigation
- Post-Breach Services

LOSS PREVENTION SERVICES

Loss Prevention services are designed to provide preemptive protection, strengthening your cyber defenses before attacks occur and putting your business in a position to avoid damages.

LOSS MITIGATION SERVICES

Loss Mitigation services provide financial support (payment) in the event your company is damaged by attacks or other hostile cyber events.

POST-BREACH SERVICES

Post-Breach services include a series of services designed to help your company get up and running as quickly as possible following a cyber attack, defend you from additional attacks, and restore your company's public reputation as quickly and effectively as possible.
